

## PRODUCT DATA SHEET

# Casco<sup>®</sup> FoamGun Cleaner

Designed for cleaning of Foam applicator guns.

### DESCRIPTION

Removes fresh, uncured PU-foam

### USES

- Cleaning liquid in spray bottle
- Cleaning liquid for foam guns

### CHARACTERISTICS / ADVANTAGES

- High cleaning efficiency
- Universally applicable
- Quick and residue-free cleaning of fresh, not yet cured PU Foam
- Internal and external cleaning of PU foam dispensing guns

### PRODUCT INFORMATION

<b>Composition</b>	Basis: Acetone Aerosol propane/butane propellant
<b>Packaging</b>	500 ml
<b>Shelf life</b>	24 months
<b>Storage conditions</b>	Store in a cool dry well-ventilated area between +10 and +20°C. STORE IN UPRIGHT POSITION protected from humidity, frost and heat. Keep container closed and sealed until ready for use.
<b>Volatile organic compound (VOC) content</b>	100 %

### BASIS OF PRODUCT DATA

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

### ECOLOGY, HEALTH AND SAFETY

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data.

### APPLICATION INSTRUCTIONS

**Use gloves and eye protection and apron for your own security.**

Keep the can at room temperature.

Higher temperature than +50°C will cause explosion of the can.

Secure good ventilation.

Casco<sup>®</sup> FoamGun Cleaner for applicator guns removes and dissolves fresh, uncured PU-foam. The Cleaner can's standard-thread adapter fits all commonly used guns.

Thorough cleaning of the internal gun mechanism is enhanced by the pressure the propellant exerts.

The active ingredients of the Casco<sup>®</sup> FoamGun Cleaner are consistent with the materials used in the manufacture of PU foam applicator guns.

Frequent use of Cleaner maintains them in good working order.

The can is fitted with an adapter ring which screws on to the gun.

For use without the gun, the can is fitted with a spray head.

This dual function meets the requirements of the professional user.

## DIRECTIONS FOR USE

A suitable waste container and a cloth should be at hand for disposal of waste fluids and wiping away cleaner fluid and dissolved PU foam residues.

Remove the PU-foam can from the gun. Use the spray head on the Casco® FoamGun Cleaner to clean the adapter part and the outer body of the gun.

Remove the red spray head from the FoamGun Cleaner-can and carefully screw the can on to the gun.

For safety reasons, the gun trigger should be pulled whilst screwing on the cleaner can. This will depressurize the gun.

Pull the trigger to purge the gun. As soon as cleaning fluid appears at the tip of the gun, release the trigger and allow the cleaner to work inside the gun for approximately two minutes, and then flush out the gun into a waste container.

Repeat this procedure until only clear cleaner fluid comes from the gun.

Once the cleaning procedure is completed, unscrew the FoamGun Cleaner-can from the gun.

**Important:** Only fresh foam can be removed with Casco® FoamGun Cleaner.

Cured foam can only be removed by mechanical means.

**Note:** Sharp instruments must never be used on PU-foam applicator guns as this may damage the protective coating of the gun.

The instructions, both for the can and the gun, must strictly be observed. To extrude the foam, pressure has to be carefully applied to the gun trigger.

Clean skin with water and soap or hand cleaner after using.

## LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the declared data for this product may vary from country to country. Please consult the local Product Data Sheet for the exact product data.

## LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Casco products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request or on the website [www.casco.eu](http://www.casco.eu).
